Personal Profile System® Graph Multiple Person Comparison

This multiple person comparison report uses the Behavioral Tendency Continuum and the Personal Profile System® graph to display individual differences. Each person's displayed behavioral potential is based on his or her profile pattern. The intensity levels displayed for the thirty-two behaviors that are included in the Behavioral Tendency Continuum represent potential rather than actual, observed behavior. The intensity levels are meant to be used to increase understanding and respect for individual differences. The behavioral levels displayed are not meant to be used as judgments of the behaviors. The behaviors are neither good nor bad in themselves; they are simply different based on each person's range of behavioral responses.

By comparing the behavioral responses of several people, a greater appreciation for the impact of differences on our interactions can be developed. It may be helpful to discuss the Continuum item by item, emphasizing those behaviors that seem to have the greatest impact on interactions.

Behavioral Tendency Continuum

This continuum displays the potential range of behavioral intensity for each person in this comparison. This continuum represents potential behavior based on the person's profile pattern rather than actual, observed behavior. This information is most helpful when discussed and evaluated based on experience with the people in this comparison.

Worksheet for Multiple PPS Comparison

After reviewing the Personal Profile« Comparison Grid, use this worksheet to develop strategies for applying the information in the way that will be most useful in your situation.

1. List those behaviors that indicate the greatest difference.

2. List those behaviors that indicate the least difference.

3. What actions need to be taken based on this information?
